## EXPERIENCE

2025 - Present

### Software Developer

Beauty Streams (Beauty Nexos) project by Code Particle Inc - Culver City, California, USA

- Developed and maintained cross-platform UI using Flutter, delivering consistent UX across mobile and web
- Implemented entitlement-based feature gating system (Free vs Paid tiers) to control access to content and features
- Integrated Strapi CMS (v5) for dynamic content management (profiles, products, editorial content, localization)
- Optimized analytics APIs and frontend data handling, achieving ~80% performance improvement (7s → ~1.3s)
- Built and refined key product features including Directory, Product Library, Editorial, Endorsements and Profile systems
- Standardized UI components and design system alignment with Figma, improving consistency across 30+ screens
- Implemented backend logic in CMS by designing single-type schemas and integrating lifecycle hooks to manage data flow and enforce business rules.
- Collaborated closely with designers, software engineers, and stakeholders in Agile environment to deliver production-ready features

2024 - 2025

### Software Developer

Athletic Greens (AG1) project by Code Particle Inc - Culver City, California, USA

- Built scalable frontend architecture using React (Next.js) and TypeScript
- Developed and maintained reusable component library (@ag1/ui) with SSR compatibility
- Integrated Strapi CMS (v5) for dynamic content rendering and localization (i18n)
- Resolved complex issues related to SCSS modules, bundling, and SSR across environments (Vite, tsup, Next.js)
- Led the development of an in-house asset library for the Offer Builder, driving architecture, implementation, and delivery end-to-end.
- Collaborated with cross-functional teams to ensure alignment between design, backend, and frontend implementations

2025 - 2026

### Software Developer

Andoe - Vancouver, British Columbia, Canada

- Built an AI-powered platform to analyze brand visibility using OpenAI API
- Designed and implemented Next.js Fullstack architecture (App Router + server-side functions (Query Functions))
- Improved performance by offloading heavy AI computation to server-side functions, reducing client load
- Developed full frontend experience including:
  - UI/UX implementation
  - State management with using context state management
  - API integration and data flow
- Designed scalable API layer for handling AI requests and structured responses
- Focused on performance, responsiveness, and scalability for AI-driven features
- Independently owned end-to-end development (frontend → API → performance optimization)

2023 - 2023

### Full stack Developer

Blink moon Games - Vancouver, British Columbia, Canada

- Developed game store frontend using JavaScript
- Built real-time in-game UI systems and interactive components
- Designed and implemented game item store (shop system) UI and flows
- Optimized UI performance for smooth gameplay interactions with using Unreal Engine (UE)

## EDUCATION

2023 - 2024

### DIPLOMA OF EDUCATION

Web Development - BrainStation - Vancouver

2013 - 2017

### BACHELOR OF SCIENCE

Computer Science - Gachon University - Korea

## EXPERTISE

React (Next.js), TypeScript, Flutter, Dart, JavaScript

Strapi, REST APIs, Supabase, Postgres, OpenAI API

SCSS, Design Systems, SSR, Performance Optimization, Elastic

Search, ShadCN

Git, Vercel, BitBucket, Jira, AI Integration, Feature Gating Systems,

CMS Integration, Component Library Development

## ACHIEVEMENT

2026

### AWS Certified Cloud Practitioner

Amazon Web Service - Issued Apr 2026 · Expires Apr 2029

2026

### IEC-BC MentorConnect Program

Immigrant Employment Council of BC

2016

### Seoul Business Agency (DBA) SBA Hackathon

Seoul Business Agency - Issued Jun 2016
